

A step towards **Greener Future**

COMPANY PROFILE

ABOUT HPN

Husk power Nepal Pvt. Ltd. (HPN) is a private company established in August 2013 with an objective to provide cost effective renewal energy technologies (RETs) in Nepal. The company was established as a response towards bringing down the vulnerability caused by impacts of global warming, climate change, poor use of available biomass resources and underutilization of other renewal energy resources in Nepal. The factory is located in Birgunj Metropolitan City Ward No. 21 (Patel Nagar Area) of Parsa district.

Husk Power Nepal is working on the manufacturing of clean cook stoves & Husk Pellets from last five years to reduce indoor air pollution in Nepal with the support from Alternative Energy Promotion Center (AEPIC), SECF/NREP, UNDP, Practical Action, Government Agencies and Local Communities. HPN is one of the fastest growing manufacturing company in the area of clean cook stove & Husk Pellets in Nepal.

WHY HUSK PELLETS

HPN is producing temperate "husk pellet" (capacity: 20 ton/-day). This is the Nepal's first husk pellet producer company. Rice husk pellet can be burned in pellet stove, furnace, industrial boiler and other heating appliances. Now a days, biomass pellet fuels are widely used in industrial production, power generation and control heating.

The benefits of husk pellets are cost effective, environment friendly, very high calorific value, renewable, reliable and sustainable fuel source, and able to replace fossil fuel. Husk pellet is highly acceptable for cooking purpose in Asia Pacific Region. This is the best alternative for the firewood and fossil fuel in Nepal.
